Dry Fluid is Better Fluid

Donaldson Clean Fuel & Lubricant Solutions Offers Reservoir Air Dryers to Keep Bulk Tanks Free of Water, Moisture

MINNEAPOLIS (October 29, 2015) – Clean Fuel & Lubricant Solutions, a business unit within Donaldson Company, Inc. (NYSE: DCI), recently introduced its Reservoir Air Dryer for fluid tanks and reservoirs. The new product is designed to eliminate the need to continually replace conventional desiccant breathers or to dry fluids with vacuum dehydration units.

Water in fluid tanks can cause major problems: corrosion, pump cavitation, viscosity changes, additive dropout, oxidation and a host of other major system issues. The Donaldson Reservoir Air Dryer offers a solution to curb the damaging effects of moisture by dehydrating the reservoir headspace and removing dissolved moisture from exposed oils and fuels.

The Reservoir Air Dryer combats moisture by introducing a steady flow of clean, dry air into tanks and reservoirs. The airflow keeps humidity relatively low in the headspace, pulling moisture from the fluids and preventing condensation.

Additionally, installation is easy and takes relatively little time. “Installation of the Reservoir Air Dryer involves no electrical hook-ups,” said Scott Grossbauer, Global Director – Donaldson Clean Fuel & Lubricant Solutions. “You simply connect compressed air to the inlet of the unit and plumb into the headspace of the tank or reservoir.”

Donaldson Reservoir Air Dryer benefits:

- Operates with standard plant air — instrument-quality air is not required
- Collects oil and water droplets, as well as fine particles present in inlet air drains automatically – purges captured liquid without any required intervention
- Monitors filter condition continuously via a visual indicator
- Reduces plant air dew point
- Ensures low pressure and flow of air into the tank or reservoir via a pressure regulator

Donaldson also reminds users not to forget the Thermally Reactive Advanced Protection (T.R.A.P.) Breather. When the Donaldson Reservoir Air Dryer is combined with a T.R.A.P. Breather, the complete system keeps moisture and contamination out, even when the fluid-flow rate outside of the tank surpasses the dryer-flow rate into the tank. The Reservoir Air Dryer also regenerates, or dries out, the T.R.A.P. Breather, increasing filter life and reducing total cost of ownership.

If you have a water problem in your tanks or reservoirs, explore the option of a Donaldson Reservoir Air Dryer.

“It won’t always replace the need to use a vacuum dehydrator, but it can help prevent moisture from entering your fluid system through the tank or reservoir, avoiding damaging problems down the line,” Grossbauer added.

For more information on the Donaldson Reservoir Air Dryer or Donaldson Clean Fuel & Lubricant Solutions, please contact Scott Grossbauer at Scott.Grossbauer@Donaldson.com or phone 952-887-3168.

About Clean Fuel Solutions

Donaldson Clean Fuel Solutions is a business unit dedicated to the bulk filtration of diesel fuel. We believe that fuel-related issues shouldn't be your operational problem. We believe you shouldn't be slowed down by dirty fuel, fuel chemistry issues or water in your fuel. We believe that with clean diesel you can Achieve More.

For more information, visit www.mycleanfuel.com or call +1 855-518-7784.

About Donaldson Company

In 2015, Donaldson celebrates a century of providing global filtration solutions that improve people's lives, enhance Customers' equipment performance, and protect the environment. The 100-year-old, technology-driven Company is committed to satisfying Customers' needs for filtration solutions through innovative research and development, application expertise, and a global presence. Over 12,800 dedicated employees contribute to the Company's success by supporting Customers at more than 140 sales, manufacturing, and distribution locations around the world. In fiscal year 2014, Donaldson reported sales of \$2.5 billion and record earnings per share.

Donaldson is a member of the S&P MidCap 400 and Russell 1000 indices, whose shares trade on the NYSE under the symbol DCI. Additional information is available at www.Donaldson.com.
